-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The indicated allowability of claims 1-18 and 21-27 is withdrawn in view of the newly discovered reference(s) to Lowndes et al (U.S. Patent No. 6,201,012).

Rejections based on the newly cited reference(s) follow.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-18 and 21-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lowndes et al (U.S. Patent No. 6,201,012) in view of Mihalik (U.S. Patent No. 6,340,672).

Lowndes et al disclose combining ivermectin with polyethylene glycol and granulating said composition (column 16, Example 1). Lowndes et al disclose the use of an ivermectin containing composition as an anthelmintic but do not disclose the addition of tetrahydropyrimidine, pyrantel and praziquantel or fenbendazole or

febantel. However, since anthelmintic compositions comprising ivermectin, tetrahydropyrimidine, pyrantel and praziquantel or fenbendazole or febantel were well known in the art at the time the claimed invention was made as disclosed by Mihalik (column 3, lines 17-32), it would have been prima facie obvious to add additional anthelmintic agents disclosed by Mihalik to anthelmintic composition disclosed by Lowdes because the results from such a combination would have been expected.

Applicant's arguments filed June 8, 2007 have been considered but are moot in view of the new ground(s) of rejection.
